Description

The search functionality allows users to search and find accommodations that meet their criteria.

This functionality is a key component of the website therefore it must be accessible, well aligned, intuitive and provide the desired results.

Preconditions

- user must use Chrome browser on the PC
- user has stable internet connection
- the travelminit website homepage is opened in the browser
- user must be logged in

Acceptance criteria

- user should easily find the search bar on the webpage
- user should be able to use search parameters as destination, arrival date and leave date
- user should be able to use search parameters as number of guests and rooms, property type, payment options
- search bar should be intuitive and provide suggestions following user's input
- user should be able to filter the results, sort the results and view the search results on a map
